MEMORANDUM FOR: Director, Intelligence Community Staff

FROM: Deputy Director of Central Intelligence

SUBJECT: Minimum Computer Security Standards

1. I would like you to develop Community-coordinated minimum acceptable computer security standards. These would then be applied to any Community computer networks that we might develop. You might want to consider the DoD Computer Security Evaluation Center's criteria for computer security as a starting point.

2. Please advise how much time you think you will need to complete this effort.
